Book Worksheet 6

The Web & the All-in-One Device

Read: The World Wide Web (1990–2005) · The All-in-One Device (2006–Now) · Conclusion
The History of the Computer · Rachel Ignatofsky · Pages _____ to _____

The Big Picture

The World Wide Web connected people everywhere, and smartphones put a computer in almost every pocket. Now AI and the Internet of Things are writing the next chapter.

Part 1 · Influential People & Inventions

Fill in the table as you read.

Who / What	What did they create or do?	Why did it matter?
Tim Berners-Lee		
Search engines (e.g., Google, 1998)		
Wikipedia (2001)		
Smartphones (iPhone, 2007)		
Internet of Things		
Artificial intelligence		

Part 2 · Fill It In

Use each word from the word bank once.

crowdsourcing

Artificial intelligence

hyperlinks

Internet

CERN

Things

1. The _____ is the network of connected computers; the Web is the system of linked pages that runs on it.
2. Tim Berners-Lee invented the Web while working at _____ and gave it away for free.
3. Web pages are connected by _____.
4. Wikipedia is an example of _____ — many people contributing online.
5. The Internet of _____ connects everyday objects to the Internet.
6. _____ lets computers learn patterns from data, as in self-driving cars.

Book Worksheet 6

Check Your Understanding

Part 3 · Timeline

Order these events from earliest (1) to latest (6). Write the number in the box.

- | | |
|---|--|
| ☐ A. The iPhone is released | ☐ B. Google is founded |
| ☐ C. Berners-Lee proposes the World Wide Web | ☐ D. YouTube launches |
| ☐ E. The first website goes online | ☐ F. Wikipedia launches |

Part 4 · Check Your Understanding

1. Which statement about the Internet and the Web is true?

- A. The Internet and the Web are the same thing
- B. The Web is a service that runs on the Internet
- C. The Internet runs on the Web
- D. The Web was invented before the Internet

2. Why did it matter that Berners-Lee made the Web free?

- A. It meant websites could not have ads
- B. It made the Internet faster
- C. It stopped viruses from spreading
- D. Anyone could build on it without paying, so it grew quickly

3. Which situation is an example of computing bias?

- A. An AI trained mostly on photos of one group works poorly for other groups
- B. A website loads slowly on old Wi-Fi
- C. A phone's battery dies after a long day
- D. A search engine returns many results

Part 5 · Stories from History

Pick one story or person from this section that surprised you. **Who** was involved, **what** happened, and **why** does it still matter?

Part 6 · Unit 5.5–5.6 Connection

Your smartphone and smart devices collect data like your location, contacts, and voice. Describe one way this data **helps** you and one **privacy risk**. Then give one step you can take to protect your personally identifiable information (PII).
